	Service Compliance Notification		
Subject New Engine Oil Specification: STJLR.03.5006		Models	AJ200 Petrol AJ133 AJ126

To: All Authorized Repairers, National Sales Companies and Importers excluding USA, Canada and MENA.

For the Attention of: The Managing Director

Copies to: The Service/After-Sales Director/Manager
The Parts Director/Manager
The New Car Sales Director / Manager

Dear colleague,

The purpose of this letter is to announce that Jaguar Land Rover's own engine oil specification STJLR.03.5006 is applicable for the following engines and markets:

Engine	Markets (excluding USA, Canada & MENA)	Oil Spec	JLR Recommended Product
AJ200P (including all previous builds)	All markets	STJLR.03.5006	Castrol EDGE Professional E C5 0W-20
AJ133	All markets	STJLR.03.5006	Castrol EDGE Professional E C5 0W-20
AJ126	All markets <u>excluding</u> the cold climate markets listed below	STJLR.03.5006	Castrol EDGE Professional E C5 0W-20
	Cold Climate Markets: China*, Finland, Greenland, Kazakhstan, Kyrgyzstan, Mongolia, Norway, Russia, Saint Pierre and Miquelon and Sweden.	STJLR.51.5122	Castrol EDGE Professional E 0W-20

*All Provinces.

Castrol EDGE Professional E C5 0W-20, which has been jointly developed with Jaguar Land Rover, improves fuel efficiency and reduces CO₂ emissions* while maintaining the reduction in metal to metal friction and wear. The Castrol EDGE Professional range is the only engine oil recommended by Jaguar Land Rover.

* In tests versus Castrol Edge Professional E 0W-20

Thanks to backward compatibility of the new specification, the new Castrol EDGE Professional E C5 0W-20 (STJLR.03.5006) will now replace the previously recommended Castrol EDGE Professional E 0W-20 (STJLR.51.5122) for AJ200P and AJ133. Castrol EDGE Professional E C5 0W-20 will also replace Castrol EDGE Professional E 0W-20 for AJ126, except in cold-climate markets.

In those cold climate markets, STJLR 51.5122 will still apply for AJ126 (for better low temperature performance) and Castrol EDGE Professional E 0W-20 (STJLR.51.5122) will still be made available alongside the new oil Castrol EDGE Professional E C5 0W-20 (STJLR.03.5006).

Castrol EDGE Professional E C5 0W-20 shall be introduced as follows:

- Europe (including UK) from April 2018 onwards
- All other markets from July 2018 onwards.

Failure to use lubricants accredited by Jaguar Land Rover and meeting the STJLR specifications for vehicles equipped with these new engines may result in mechanical breakdown not covered by warranty.

We are also pleased to announce that Castrol EDGE Professional E C5 0W-20 (STJLR.03.5006) will be launched with new Jaguar Land Rover dual branding and an enhanced recommendation for small packs. The same will apply to Castrol EDGE Professional E 0W-20 in Cold Markets.

To order this product, or if you have any questions regarding pricing, minimum order quantities, lead-time, please contact your local Castrol representative or your local distributor. This product will be available in various pack sizes and quantities depending on market requirements from the dates stated above.

CASTROL EDGE PROFESSIONAL EXCLUSIVELY RECOMMENDED BY JAGUAR LAND ROVER

Yours faithfully

Huw David
Global Commercial & Customer Retention Director
