

AUX-JAG97 Auxiliary Input Adapter for 1986-97 Jaguar XJ and XK

12%

Connected to

Play portable audio devices on earlier Jaguars without investing in new Stereo.

While it is true that due to their lack of support for more attractive modern media formats, many have opted to replace the original stereo, but those adamant about keeping it we offer a line of adapters sure to open up a whole lot of different options for listening to music and other audio content. The AUX-JAG97 Auxiliary input adapter works on Jaguar CD Changer controlling radios (e.g. DBC10425, DBC6437 etc.) and provides a 3.5mm input for Smartphone, MP3, iPod, Tablet and more. Plug into 8-pin CD Changer port on stereo or to pre-wired CD Changer cable in trunk/boot, connect audio device, press "CD" button and begin to enjoy crystal clear audio playback from portable audio device. This solution is the accessory you want if you're looking for Smartphone, MP3, iPod etc. connectivity without investing in new stereo.

Product Features:

- » Vehicle must have Changer controlling Stereo (e.g. DBC10425 etc.)
- » Supports any device with a 3.5mm jack
- » Plug-n-play to Stereo in dash OR pre-wired CD Changer cable in trunk/boot.
- » Connect any audio device with 3.5mm jack including Smartphone, iPod, MP3 player and more
- » Replaces CD Changer (if present)

COMPATIBILITY & NOTES: [These issues or circumstances may affect compatibility of our product with your radio/vehicle.]

1. Works in 1986-1997 X300 (XJ6, XJR6, XJ6, XJ12) with DBC10425, DBC11303, DBC10427, DBC6437 stereo.
2. Works in 1996 - early 97 x100 (XK8, XKR) with DBC10425 Stereo
3. **Not for late 1997 X100 with AI-NET connector. These require the AUX-JAG or AUX-JAGR**
