# What's the difference between Torx® and Torx Plus® bits?

Torx Plus® bits and fasteners feature a greater engagement area for higher torque transfer and reduced camout when driving Torx Plus® fasteners. They can provide up to 100% **TORXplus®** more drive cycles.

Torx Plus® bits are not compatible with standard Torx® fasteners.

Torx Plus® is a trademark of the Camcar Division of Textron. Torx Plus® Tamper Resistant Bits are available on a limited basis. Please contact your Area Distributor or Representative for more details.
