

Inclination Sensor - Fitting Instructions

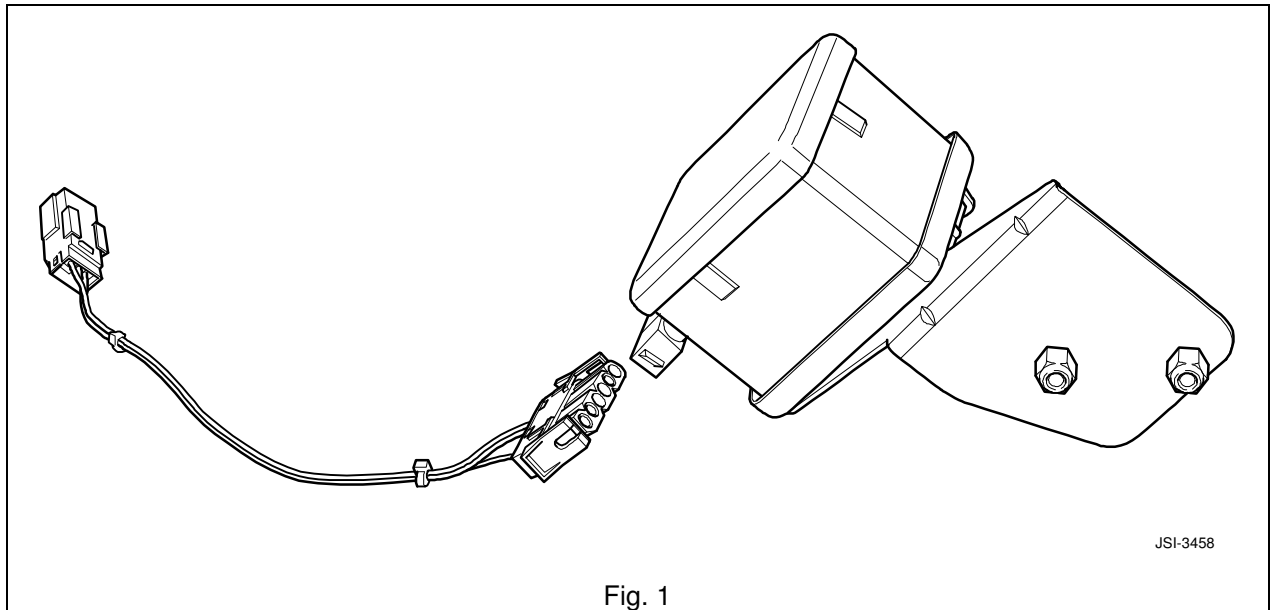

Model: V8/XJ Saloon Series 98MY

Introduction

An inclination sensor may be fitted to prevent the unauthorised jacking or towing away of the vehicle.

Parts List

- Inclination Sensor, Part Number LNC 2630 AA, includes sensor, mounting bracket, harness, multi-plugs and hardware, Fig. 1.

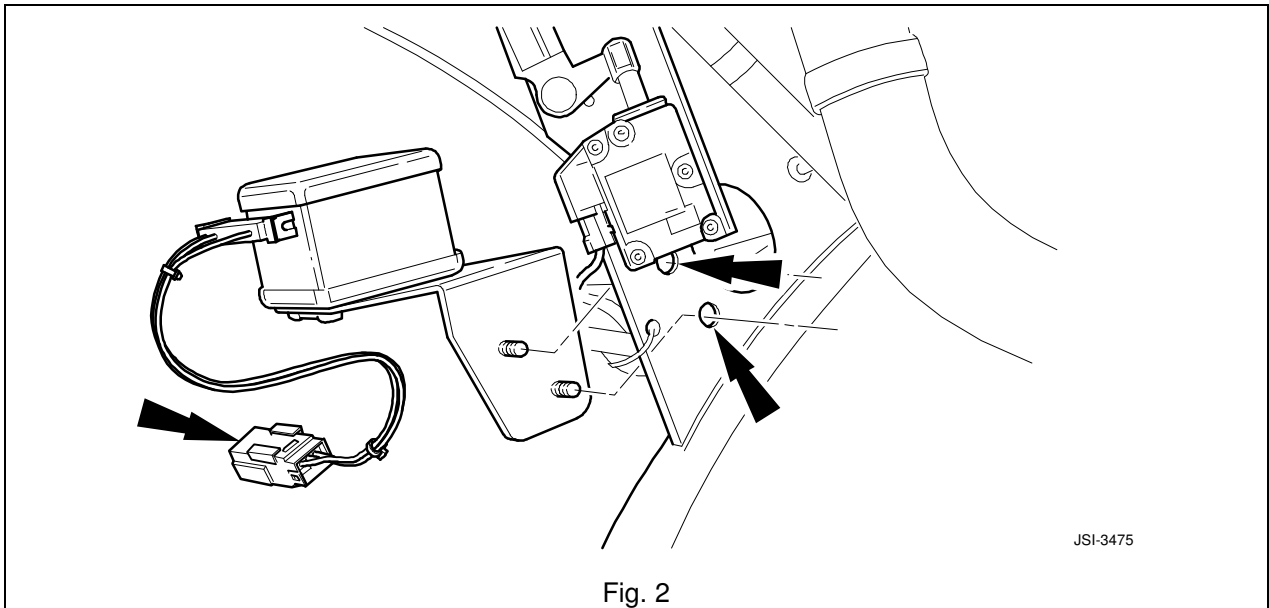

Fitting Instructions

- Open the luggage compartment lid.
- Pull back the trim material from the upper left-hand side.
- Locate the fuel filler flap mechanism bracket.
- Locate the inclination sensor socket, part of the vehicle harness, which is taped up under the trim near the fuel filler bracket.

Inclination Sensor - Fitting Instructions

- Bolt the inclination sensor assembly onto the two mounting holes in the fuel filler bracket, arrowed, Fig. 2.
- Connect the sensor plug, arrowed, Fig. 2, to the harness socket.

- Replace the trim material and close the luggage compartment lid.
