Additional Portable Diagnostic Units – Available Separately

MODEL All
VIN

ISSUE:

Portable Diagnostic Units (PDU) are available individually without the base station. The purchase of individual PDUs is recommended for high-volume Jaguar service facilities where more than one diagnostic technician requires the use of a PDU at the same time.

ACTION:

Order individual PDUs through your zone parts department under the following part number:

<u>PART NUMBER</u>	<u>DESCRIPTION</u>	<u>PRICE</u>
JAG 3130/076500	Individual PDU kit	\$3500.00

The components included in the above kit are listed on the following page. The annual service support fee of \$145 for each individual PDU ordered will be debited directly to your parts account. Individual PDUs, as well as, complete PDU systems are not for resale to the aftermarket. This equipment is a piece of Jaguar proprietary equipment for Jaguar dealers only.

NOTE: These units are capable of complete vehicle diagnostics and should not be confused with generic scantools which only perform OBDII tests.

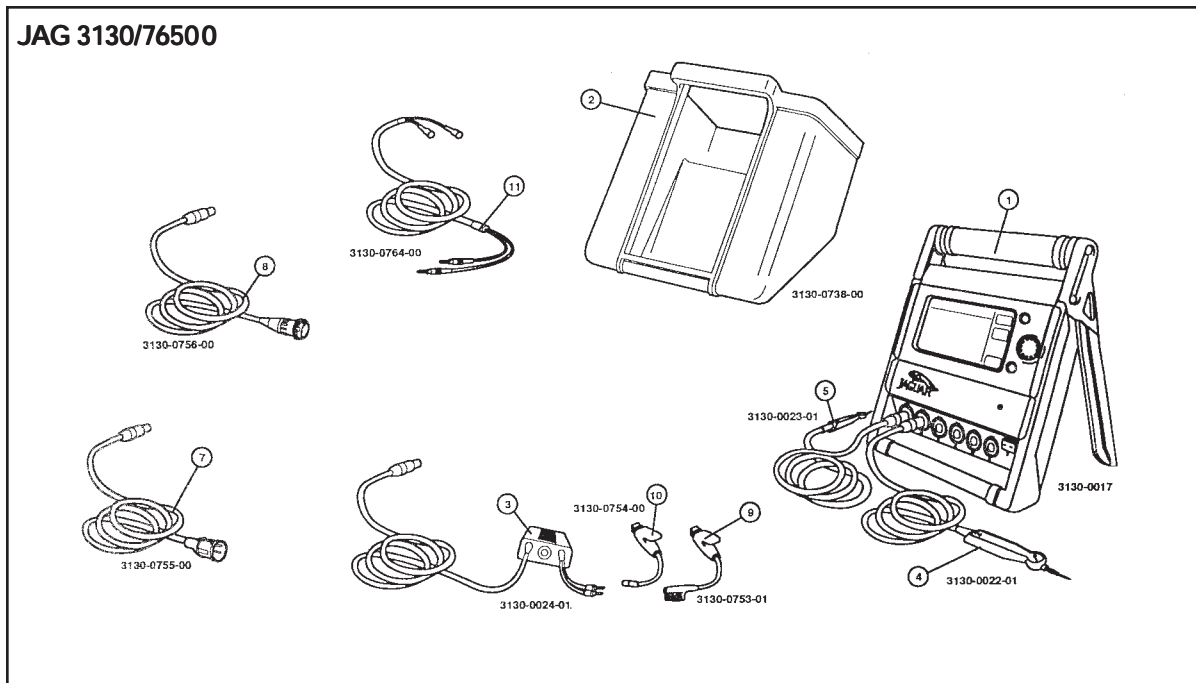

JAG 3130/76500

ILLUSTRATION 1

The kit consists of the components listed below and must be used with an existing base station.

Item	Description	Part Number
1	Portable Diagnostic Unit (PDU)	3130-0017-01
