Replacement parts that are not of genuine Jaguar supply cannot be relied upon to be of correct specification, material, and workmanship and therefore Jaguar cannot be expected to extend warranty to vehicles which have been fitted with parts not supplied by them.

Jaguar reserves the right to make changes or improvements in the construction or specification of their products at any time.

IN ORDER TO ENSURE PROMPT AND CORRECT EXECUTION OF
YOUR ORDERS, IT IS ESSENTIAL TO QUOTE:

1. The relative Unit Number, together with prefixes, suffixes and specification references where applicable.
e.g. Axle, Body, Vehicle Identification, Engine, Gearbox Numbers etc.
2. The Part Number and description (prefix and suffix letters to Part Numbers must always be quoted).
3. Always state the colour of carpets, painted items, trim items etc., using the colour code from the Vehicle Identification Number (VIN) plate and the colour combination key to identify the colour name.
4. The quantity required bearing in mind that the quantities shown are those used in the application actually illustrated. Sometimes only minimum package quantities are available. These packs may well contain more parts than are required for a single job; for details of packaged quantities, see the Service Parts List.

THE LISTING OR ILLUSTRATING OF AN ITEM DOES NOT
GUARANTEE ITS AVAILABILITY.

DIRECTIONS FOR USE

- 1 Establish the basic trim colour of the car. These are colours which appear in the Jaguar sales and advertising literature.
- 2 Select the basic trim colour in the left hand column of the chart.
- 3 Select the trim required from the description across the top of the chart.
- 4 By reading across and down the colour, the colour for the part can be obtained.

Colour Suffix Identification Table
This table contains the Part No. suffixes for colour keyed parts. In some cases the microfiche text provides a core Part No. together with a "Dummy" suffix.

Using this table, the "Dummy" suffix can be converted into an acceptable Part Number Suffix appropriate to the colour range available. Where there are limitations of use for a specific colour, then VIN change points are denoted by the numbers after the individual suffix codes. These are referenced at the foot of the page.

Method: A) Determine the Part No. required, together with the "Dummy" suffix, from the appropriate text page in the microfiche.

B) Select the column headed by the "Dummy" suffix number/letter given with the core Part No.

C) Choose the colour suffix required in this column against the descriptions available.

D) Check with any change point information indicated.

E) Replace the "Dummy" suffix with the chosen 2 or 3 character code.

Example:

- a) Part No. from text = BEC 3942 '6'
- b) Trim colour required = Mid Grey
- c) Align Mid Grey with the code in column '6'
- d) Read suffix LEM
- e) Check for VIN change points
- f) Order/select Part No. BEC 3942 LEM
